SPORTS INJURIES

First Step Rehab provides progressive sports rehabilitation for athletes of all ages and playing levels. The facility is equipped to meet the challenges of athletes at all levels.

PHYSICAL THERAPY

Our rehabilitation program is individually tailored to each patient and includes strengthening, pain relief modalities, patient education and a carefully monitored exercise program.

SPINAL CARE & REHAB

Our practice offers state of the art evaluation and treatment of all regions of the spine including cervical, thoracic and lumbosacral pathology.

ACUPUNCTURE

We integrate the latest technologies of American medicine with the philosophies of traditional Chinese acupuncture to provide natural, non-surgical, pain free and individualized patient care.

AUTO ACCIDENTS

It is important to seek care right away after an injury because treatment is more effective and liability is more clearly established with the insurance company at fault. If you have been injured, don't delay.

MASSAGE THERAPY

Massage therapy is effective for the relief of specific injuries, many chronic and medical conditions, stress management, and also maintains an overall good health.

WORKMANS' COMP.

In addition to helping build your strength, flexibility, endurance, etc., we design therapies to help get you back to performing the specific tasks required for your job.

WII REHABILITATION

We understand bending and stretching repeated over a course of time becomes boring. The Wii not only promotes physical activity but also mental concentration with the game interaction.
